

REMARKS

By this paper, the Applicants seek to supplement the *Amendment* filed on August 26, 2005 by: (a) amending Claim 65 to correct a minor informality in the claim as originally presented to the Examiner; and (b) to add new Claims 71-74.

It is submitted that newly presented Claims 71-74 are patentable for the reasons set forth in the *Amendment* filed on August 26, 2005 with respect to Claims 60-62. More specifically, new claims 71-74 are directed to a method for remote monitoring of a premises in which an access token which enables the remote client to access the security gateway will terminate independently of initiations and/or terminations of accesses to the security gateway, a feature neither taught nor suggested by the art of record.

A check for \$100 in payment of the small entity fee required for presentation of one additional independent claim is enclosed herewith. It is believed that there are no other fees due in connection with this communication. However, in the event that there are additional fees associated with this communication, the Commissioner is authorized to charge any additional fees connected with this communication or credit any overpayment to Deposit Account No. 50-1515.

This application is now considered to be in condition for allowance. A prompt Notice to that effect is, therefore, earnestly solicited.

Respectfully submitted,

Date:

September 13, 2005
